DETAILED ACTION

Claims 19-41 are pending in the instant application.

Election/Restrictions

Applicant's election with traverse of compound 7 in the reply filed on 08 September 2008 is acknowledged. The traversal is on the ground(s) that the species share a common core structure. This has been found to be persuasive, and a new lack of unity requirement is set forth below.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 19-41(in part), drawn to diodes comprising a compound of formula I

where m is 0, o is 0, n is 3, and carbene is -.

Art Unit: 1626

Group II, claim(s) 19-41(in part), drawn to diodes comprising a compound of formula I

where m is 0, o is 0, n is 3, and carbene is .

Group III, claim(s) 19-41(in part), drawn to diodes comprising a compound of formula I

where m is 1, o is 1, n is 2, and carbene is .

Group IV, claim(s) 19-41(in part), drawn to diodes comprising a compound of formula I

where m is 1, o is 1, n is 2, and carbene is .

Group V, claim(s) 19-41(in part), drawn to any other compound of Formula I not mentioned in Groups I-IV. If the Applicant decides to elect Group V, Applicant must additionally elect a single compound for the Examiner to build a group around.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the groups are linked together via formula I which does not have a constant core structure. Lack of a constant core structure leads to an *a priori* determination of lack of unity as there is no substantial shared structure to act as the special technical feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1626

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
